

Sterile Processing Services of America (SPSA) is an offsite medical device and instrument sterilization service provider that supports hospitals, surgery centers and clinics with emergency, contingency and decompression services. SPSA has state-of-the-art reprocessing facilities in Long Beach and Modesto, California. Significant investments have been, and continue to be made in facilities, processing technology, capacity, distribution, operating and quality systems, leadership, and employee training with the sole purpose of being the industry leader in offsite surgical instrument sterilization.

The benefits of contracting SPSA offsite reprocessing services include but are not limited to the following:

- Gaining access to SPSA’s processing capacity and dedicated resources
- Product validations to customer requirements as well as medical standards
- Optimized control and adherence to quality and regulatory standards
- Volume processing flexibility
- Inventory control and management
- Rapid response and turnaround including emergency services
- Increasing your organization’s overall operational efficiency
- Reduction of your fixed costs, overhead costs, capital equipment and facility costs
- Accurate accounting of costs by product type and corresponding cost control
- Creating a partnership that adds value to your organization
- Risk mitigation

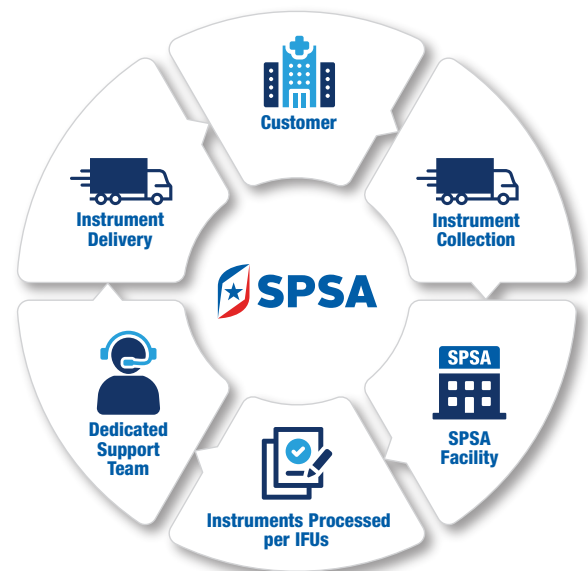

SPSA is committed to quality standards set by organizations such as AAMI and ASHRAE. SPSA ensures their customer’s specific regulatory and product requirements are met and is FDA compliant. All medical products are processed in areas that are temperature, humidity, and air pressure controlled. SPSA is currently preparing for certification to the Medical Device Quality Management System Standard, ISO 13485:2016, in 2025.

Who We Serve

We support hospitals, surgery centers and clinics with their critical surgical instrumentation sterilization processing needs.

What We Do

SPSA is an offsite medical device and instrument sterilization processing service that provides decontamination, assembly, sterilization, and distribution services. SPSA supports its customers emergency, contingency, and decompression requirements.
